DESIGN ETHOS

The natural world offers a myriad of design possibilities.

Each acts as a door, opening up a world of inspiration for us. From the most striking, to subtlest, our designs are a tribute to nature's artistic prowess. Which is why, we find ourselves on a never-ending quest to replicate the best of nature in our tiles.

We source natural products from around the world, dedicating our designs, technology, and manufacturing processes towards providing a closer-to-nature-look. It's more than a way of life for us. It's the ethos we live by.

And it is all brought to life through cutting-edge technology, superior processing systems and a designer mindset that takes shape in the form of our product offerings - Tiles, Marble and Mosaics.

Glazed Vitrified Tiles

The Magnified Collection by NITCO,

A new dimension in surface design that pushes the boundaries of creativity and technology. As a pioneer in achieving innovative surfaces, NITCO has curated a range of tiles in the 800x1600 size that are truly exceptional. This new finish category in the Magnified Collection is a game-changer, with two standout typologies that are sure to captivate the design world.

First, the Exotic Collections are a true celebration of luxury. NITCO has recreated the timeless beauty of exotic marbles in these tiles, bringing opulence and grandeur to any space. The intricate details, unique patterns, and rich colors of these marble designs are meticulously crafted to perfection, making them a true statement of luxury.

Second, the Infinite Collection is a testament to NITCO's commitment to replicating the beauty of natural marble and stone. These tiles boast an endless range of design typologies, with each face of the tile showcasing a unique pattern and texture that closely mimics the natural beauty found in nature. The result is a mesmerizing visual effect that brings the authenticity of natural marble and stone into your space.

Both the Exotic Collections and the Infinite Collection are part of the Magnified Collection, which is a showcase of NITCO's cutting-edge technology and unparalleled creativity. These tiles are not just surfaces, but works of art that redefine the concept of luxury and aesthetics in surface design. With these Collections, NITCO continues to push the boundaries of what is possible in surface design, offering architects, designers, and homeowners a world of endless possibilities to elevate their spaces to new heights of elegance and sophistication.

Glazed Vitrified Tiles

The Marble, Stone, Wood & Cement Collection

Redefining contemporary surface design, NITCO presents the The Marble, Stone, Wood & Cement Collection in the versatile 600x1200 size. This collection blends the timeless elegance of marble, the raw beauty of natural stone, the rustic charm of Wood, and the modern simplicity of cement textures, offering an exquisite range of tiles that are both functional and artistic.

The Allure of High Gloss & High Gloss Exotic

For those seeking ultimate sophistication, NITCO offers high gloss tiles designed exclusively for wall applications. These tiles stand out with their unparalleled shine, mirror-like reflectivity, and intensified color vibrancy, making them the perfect choice for creating bold, luminous spaces.”

NITCO Floor Tile Installation Guide

For Vitrified Floor (B1a) tiles

Before starting the installation process, it is important to ensure the surface is clean, smooth, dry, and free of wax, soap scum, or grease.

Step 1: Assortment of Tiles

Check the Batch No. of the tiles. Ensure that a confined place should have the tiles with similar batch no.

Step 2: Surface Preparation

Remove moldings, trim, or any other obstacles that may interfere with installation. Mark the center point of all four walls and snap chalk lines between the center points of opposite walls, intersecting at the center of the room.

Step 3: Applying Adhesive

Select the right adhesive for the substrate and spread a 1/4"(Or follow the instruction given by the adhesive technical person) coat on the surface of one grid area.

Step 4: Cutting Tile

Measure tiles to be cut and mark with a pencil or felt-tip pen. Make straight or diagonal cuts with a tile cutter, curved cuts with a nipper, and full-length curved cuts with a rod saw.

In case of the window cut in big format it is recommended to do the cut with proper way if the No. of window is more than 2 it is to be cut by water jet cutter. For round cut the round drill bit of the required diameter needs to be used.

Step 5: Setting Tile

Mix tiles from several cartons as you set, for a blended effect. Start installing tiles as per your specified design. Please keep in mind that the tiles are having the arrow marks at the back to get a good aesthetically good laying keep the arrow mark of all the tiles in one direction .Another important point is that the layer must match the corner of the tiles. One grid at a time, finishing each grid before moving to the next. Insert tile spacers (3 to 4 mm) as each tile is set or leave equal joints between tiles. Fit perimeter tiles in each grid last, leaving a 1/4" gap between tile and wall. Tap in all tiles with a rubber mallet or hammer and wood block to ensure a good bond and level plane.

Step 6: Grouting Joints

Wait about 48 hours before grouting, remove tile spacers and spread grout on the tile surface, forcing down into joints with a rubber grout float or squeegee. Wait 15-20 minutes for grout to set slightly, then use a damp sponge to clean grout residue from surface and smooth the grout joints. Rinse sponge frequently and change water as needed. Let dry until grout is hard and haze forms on tile surface, then polish with a soft cloth. Wait 72 hours for heavy use, then apply sealers or polishes only in accordance with manufacturer's recommendations.

Lastly, remember not to walk on the tiles or do any other activity in the same place until they are set (usually within 36 hours) and keep the installation area clean and dry during the process.

Handling Tips for NITCO Large Format Tiles

Dos:

- Make sure the substrate is level before installing large format tiles.
- Use medium bed mortar for tiles with dimensions greater than 20" x 20" or tiles with greater thickness than normal.
- Back-butter tiles during installation to ensure proper body coverage.
- Ensure at least 90% mortar contact and a minimum grout joint of 3/16".
- Use Vacuum Sucker for lifting the tiles and placing on the substrate for fixing.
- Use Diamond cutter and Diamond Drill bit for cutting and drilling and cutting the tiles.
- Always stack the tiles vertically in the ware house.

Don'ts:

- Don't install large format tiles on an uneven substrate.
- Don't use regular thin-set mortar for large format tiles. It will be the best if you can consult the technical person from the adhesive regarding the thickness of the layer.
- If No. of cutting in the single tiles are more than 2 , cut in water jet cutter do not cut manually.
It may crack or break the tiles.
- Do not handle the tiles manually.

Technical Specifications 600 x 600 mm, Glazed Vitrified Tile.

Test Description	Standard Test Method	ISO 13006:2018 E Specification Bias	NITCO'S Value
